THE VAN GARDENS

HIGHLY COMMENDED GLADIOLUS

SPRING 1946

C. C. VAN VOORHIS

AND

R. E. WHEELER

KINGSTON

NEW JERSEY

PROSPECTIVE PATRON: Our originations have won so many awards at the Shows and Trial Gardens where they have been exhibited or tested that we believe many of them will become great favorites with show fans and other Glad lovers when these varieties become better known. AS AN AID TO THE WIDER DISSEMINATION OF OUR VARIETIES, WE WILL GIVE ONE DOLLAR VALUE IN GLAD BULBS FOR EACH FIRST PRIZE, TWO DOLLARS VALUE ADDITIONAL FOR SECTIONAL CHAMPIONSHIP, AND FIVE DOLLARS VALUE ADDITIONAL FOR GRAND CHAMPIONSHIP WON IN A 1946 STATE OR REGIONAL GLAD SHOW WITH ANY OF OUR ORIGINATIONS; ALL WINNERS CHOICE IN LARGE OR MEDIUM BULBS OF OUR OWN VARIETIES. PLEASE SEND A PRIZE CERTIFICATE OBTAINED FROM THE SHOW COMMITTEE. ALSO STAMPS TO COVER POSTAGE ON PRIZE BULBS UNLESS AN ADDITIONAL ORDER OF AT LEAST \$2.00 IS INCLUDED.

Our varieties have been developed on fairly heavy soil which assures that they should do well on almost any type of soil; this not being true of many varieties developed on light soil.

During the war we were late in planting many of our bulblets, consequently we are not listing small size in some varieties and may run short of small bulbs in others. If we do we will substitute 20% greater value in medium size.

PRICES GIVEN ARE FOR ONE BULB, 5 BULBS WILL BE SUPPLIED AT 4 TIMES, AND 25 BULBS AT 17 TIMES THE SINGLE PRICE. 10 BULBLETS FOR THE PRICE OF A LARGE BULB AND 100 AT 7 TIMES. POSTAGE PAID ON PREPAID ORDERS OVER \$2.00. 5% DISCOUNT ON ORDERS OF \$5.00 TO \$10.00; 10% DISCOUNT ON ORDERS OVER \$10.00. NO LABELED SINGLE ITEM LESS THAN 15 CENTS EXCEPT IN COLLECTIONS.

Now that the war is over we expect to be able to make shipments as soon as danger of freezing is past. Orders for bulblets should be sent before March 15th.

OUR 1946 RELEASES

We believe that these varieties are well worth while and we are pricing them low enough that you can afford to give them a trial.

CRINKLED GOLD. Midseason, S. Inf. (Parentage unknown). Golden yellow with much-crinkled edges. A fine, dainty variety.

L. 50c, M. 35c, S. 25c

DOT BERRY (44-A) L.Mid., L.Inf. (?) Gloriana + [The Orchid + Com. Koehl] + (Apricot Glow + Bill Sowden). Slightly ruffled rose-pink with cream throat-stippling. An excellent commercial.

L. 50c, M. 35c, S. 25c

FLEETSMITH E.Mid., L.Inf. (Byron L. Smith + Dr. Van Fleet). Dainty lavender with tawny rose stippling in cream throat. This is a variety we have been growing for years for commercial sales and we have decided to introduce it because of its earliness and dependability.

L. 50c, M. 35c, S. 25c

GOLDORA Late, S.Inf. (Parentage unknown). Suffusion of orange and gold. Prim type florets. Light, airy spikes.

L. 50c, M. 35c, S. 25c

HELEN MAY Very late, L.Inf. ([Am. Beauty + Tyrian Beauty] + Apricot Glow). Vivid pink with crimson lines in lemon throat. Strong growing commercial, giving wonderful spikes when most varieties have bloomed out.

L. 50c, M. 35c

MARY JO (44-H) Early, L.Inf. (Readington + Veecream). Ruffled rose-pink, purple plume edged with cream. A grand variety that will attract attention on the show table and in the flower shop.

L. \$1.00, M. 65c

VERLE JAY L.Mid., Med. (or L.?) For.? ([Veewine + Emile Aubrun] + [(Tyrian Beauty + Scarlet Wonder) + Heavenly Blue]). Rich dark-red self-color. Good commercial.

L. 50c, M. 35c, S. 25c

OUR PREVIOUS INTRODUCTIONS

ANN STRYKER Late, L.For. Deep pink, cream blotch, slightly frilled, wide open florets. Excellent, tall growing commercial and show variety.

L. 25c, M. 18c, S. 10c

BROWN ORCHID E.Mid., S (or Med.?) Inf. Brown-buff and red-brown, gold rib band. Womans Champion at Mid-West Show 1941. Many other awards. One of our most unusual and popular varieties.

L. 20c, M. 15c, S. 10c

BRUCE VAN. Early mid., L. Inf. Beautiful, ruffled blend of blush and lemon, pale salmon rose blotch. One of the most beautiful and outstanding varieties in our garden. A grand show and commercial variety. We are uncertain as to its color classification.

L. \$2.00, M. \$1.50, S. \$1.00

CAROL JEAN E.Mid., Med.Inf. Fairly dark violet blue, cream-tipped maroon feather. V. of C. by Maryland and Mid-South Trial Gardens. Excellent "Blue".

L. 25c

DANDY PINK. (44-J) E.Mid., L. Inf. Ruffled pink, large cream throat blotch. Fine commercial variety. Uniformly fine spikes.

L. 35c, M. 25c, S. 15c

DEENA DORING (44-C) Mid., L. For.? Rose-purple, dark maroon throat blotch. Makes a very fine spike.

L. 50c, M. 35c, S. 20c

EARLY BLUSH V.E., L.Inf. Blush with faint lavender plume in cream throat. Excellent commercial because of its form, color and extreme earliness.

L. 15c, M. 10c

5 bulbs at 4 times and 25 bulbs at 17 times the single price.
No labeled single item less than 15c except in collections.

EARLY VILAV V.E., L.Inf. Lavender-violet, ruby plume. V. of C. by Maryland. Extra early commercial and show variety.

L. 20c, M. 15c

GERTRUDE WHEELER Late, Med. For. Bright scarlet with cream stippling in throat. An almost certain winner in its class because of its color and form.

L. 40c, M. 25c

GLEN VAN L.Mid., L.Inf. Ruffled purplish-red, cream throat markings. V. of C., Maryland. A favorite with local florists for accent and contrast purposes.

L. 15c, M. 12c, S. 8c

HERBERT BERRY L.Mid., L.Inf.? Attractive smoky salmon, salmon rose blotch. Very nice.

L. 40c, M. 30c, S. 20c

JACKIE FERRIS L.Mid., Med.Inf.? Rosy-lavender with white splotches and cream throat. Popular with florists as cut spikes open freely to extreme tip.

L. 15c, M. 10c

JANET STRYKER Late, Med.For. Light lavender, rose striping in cream throat. Very attractive, truly formal spike.

L. 40c, M. 25c

JEANIE JAMES E.Mid., Med.Inf.? Violet-blue, large violet maroon blotch and cream rib spot. Rated "best blue" by E. A. Lins. Fine, vigorous commercial variety.

L. 35c, M. 25c, S. 18c

JIMMY BIDDLE Late, Med. (or S?) For. Buff-pink, gold throat and ribs. V. of C. by W. Va., A. of M., Maryland. Many other awards. Nine florets open on 25 to 27 inch spikes. Very attractive color.

L. 15c, M. 12c

JOHN HEEREMANS Mid., Med.Inf. Odd shade of violet rose or raspberry. Popular with local florists.

L. 20c, M. 15c, S. 10c

JOHN McKENNON L.Mid., L.For. Smoky tan and rose intermingled, cream throat stippling. Good show and commercial variety.

L. 20c, M. 15c, S. 10c

LAORA L.Mid., S (or Med.?) Inf. Slightly crinkled, rich golden orange. Very beautiful and attractive variety for those who like the smaller glads.

L. 10c, M. 7c, S. 5c

LAVENDER KING Late, L.Inf. Vivid lavender with crimson plume in cream blotch. The few misplaced florets are easily put into their proper places when desired. Excellent show and commercial variety which did well even in the drought of 1944.

L. 12c, M. 9c, S. 7c

LILA PAUL E.Mid., L.Inf.? Blush white, pale lavender plume. Slightly ruffled. Tall and beautiful. Highly commended by E. A. Lins. Good in spite of drought in 1944.

L. 75c, M. 50c, S. 35c

LITTLE PAL Mid., S.Inf. Light rose-pink, dark rose plume. Good dry weather variety and one that is "neat and friendly".

L. 20c, M. 15c, S. 10c

LORY ANN Mid., Med.For.? Deep pink, large dark rose blotch in cream throat. Long, vivid-colored spike.

L. 25c, M. 20c, S. 15c

LOYAL PINK (44-K) Mid., Med.For. Ruffled light pure pink, cream throat and rib lines. Good performance in 1944 in spite of the drought.

L. 60c, M. 40c, S. 25c

LUCILE HICKMAN L.Mid. L. (or Med.?) Inf.? Lively lavender with cream-edged rose blotch. Tall and straight spikes with occasional misplaced florets on some, but these may be easily put into place as they open.

L. 60c, M. 40c

LUCINDA Late, L.Inf.? Buff and smoky-rose intermingled, pale orange-rose blotch. More pink and more vigorous than its seed-parent, Mother Machree. Bulbs somewhat misformed, but healthy and vigorous. Was named for V. V.'s mother and is one of our favorite commercial varieties. Does well even in dry seasons.

L. 25c, M. 20c, S. 15c

5 bulbs at 4 times and 25 bulbs at 17 times the single price.

For bulblet prices see first page.

MAROON BUTTERFLY Mid., S. (or Med.?) Inf. Purplish maroon self color. A fine variety to use with other dainty glads in arrangements. L. 15c, M. 10c, S. 7c

MRS. THEO CART E.Mid., L. (or Med.?) For. Nice rose-red, cream stippling at edge of ruby-throat blotch. More pleasing color and spike than its seed parent the old favorite, Red Lory. L. 40c, M. 30c, S. 20c

NASSAU HALL Mid., L.For. Crinkled scarlet-orange, broad cream rib streaks. Sometimes crooks slightly. An unusual and impressive variety. L. 35c, M. 25c, S. 15c

ORABUFF (44-F) Mid., L.Inf. Striking blend of light orange and buff, rose stippling in lemon throat. Very popular with local florists for corsages and other floral work. L. 40c, M. 35c, S. 15c

ORANGE GLORIANA. Late, Med. Inf. Rich orange-apricot. A richer and more attractive variety with all of the good features of the good old Gloriana. L. 50c, M. 35c

ORANGE TWEEDLE Late, S. (or Med.?) Inf. Rich orange, salmon-rose lines in gold throat. Good dry weather variety. L. 12c, M. 10c, S. 6c

ORASCAR Very late, Med., Inf.? Bright orange-scarlet, rose scarlet markings in cream throat. Should be planted as early as possible and even then it may be too late for shows, but it will give you some wonderful spikes after nearly all other varieties are past. Should be valuable to commercial growers south of Boston, Cleveland and Chicago. One of the best in our garden this past year. L. 35c, M. 25c, S. 15c

PINK MAID E.Mid., L. (or Giant?) For. True pink, with some salmon splotches and pale rose-tan throat. Makes a tall stately spike with somewhat ruffled florets. L. 35c, M. 25c, S. 15c

PLEASING (44-I) Mid., Med.For. Ruffled light mulberry, cream rib streak. A pleasing and uniquely colored Glad. L. 35c, M. 25c, S. 18c

POWELSON Mid., Med.Inf. Lavender and dark rose intermingled. A very impressive Glad because of its unusual coloring. L. 25c, M. 20c, S. 15c

PURPLE BUTTERFLY E., Med. (or S.?) Inf. Raspberry purple self-color. A very desirable variety because of its earliness and usefulness as an accent to lighter small flowered Glads. L. 15c, M. 12c

PURPLE TWEEDLE L.Mid., S.Inf. Upper petals wine-purple, lower petals gold with purple edge. Nicely ruffled. Though this variety is not quite so vigorous a grower as its parents, Tweedledee and Tweedledum, its color combination makes it one of our favorites among small flowered varieties. L. 25c, M. 20c, S. 15c

PURPLE WINE Mid., L.For. Dark purplish-wine, so dark that possibly the variety should have been named Black Wine. The many buds showing color are almost black. L. 30c, M. 20c, S. 15c

RACHEL STRYKER Late, L. (or Med.?) For. Light pure pink, faint salmon-rose plume. A most beautiful variety which produces many spikes of championship quality. We hope it will be widely exhibited in 1946. L. 50c M. 35c, S. 25c

READINGTON Mid., Med.Inf. Violet-blue, cream rib spot and rose throat stippling. Though it may need to be staked, we consider it to be our best and most beautiful "blue". Silver medal for seedling, and many other awards. L. 50c, M. 40c

RED TWEEDLE Mid., S.Inf. Red, with lower petals of gold with red edge and dark maroon blotch. Neat, well-proportioned spike.
M. 12c, S. 8c

RED ROSIE (44-B). Mid., Med. (or L?) For. Bright rose-red, nearly self-color. Slightly ruffled and very attractive. 10 florets open on 26 bud flower head.
L. 60c, M. 40c, S. 25c

ROSE BUTTERFLY E.Mid., S. (or Med.?) Inf. Rosy-wine, maroon lines in gold throat. Another nice small flowered variety.
L. 10c, M. 8c

ROSE PANSY E.Mid., Med.Inf. Medium rose, dark red spot in large cream blotch. Prim type florets. As attractive as large-faced pansies.
L. 25c, M. 20c

ROSE PINKIE. Late Mid., S. (or Min?) Inf. Medium rose-pink, cream throat line and rib streak. Somewhat ruffled and very pleasing.
L. 35c, M. 25c, S. 15c

ROSE TWEEDLE Mid., Med. (or S.?) Inf. General color bright rose, two inner petals white with rose tips. Pleasing color combination.
L. 10c, M. 8c, S. 5c

RUTH VAN Late, L.Inf. Smoky rose, sometimes splotted darker, crimson stippling in cream throat. Amateur section champion, National 1940. A. of M., West Va., where it was "The Outstanding Glad" in Trial Gardens, 1940. Local florists give many repeat orders for cut spikes. Becoming more popular every year.
L. 30c, M. 20c, S. 15c

SALOMA Mid., L.Inf. Dark pink, rose-red throat stripes. This variety is for those who will take some pains to grow remarkable spikes as the flowers head is so large and heavy the stalk should be staked to prevent falling over in bad weather, but it will amply reward the painstaker.
L. 60c, M. 40c, S. 25c

SAUCINESS Mid., S.Inf. Outer petals rose with cream blotch, inner petals gold with rose tips and maroon throat blotch. This variety is for those who like the odd and unusual, and do not object to its tendency to produce many "two-faced" spikes.
L. 25c, M. 20c, S. 15c

SCARLET BUTTERFLY. Late, S. For. Ruffled light scarlet, deep scarlet blotch in gold throat.
L. 35c, M. 25c

SCARMIN Mid., S.Inf.? Brilliant scarlet, few darker splotches. Stock scarce.
L. 35c, M. 25c

SOLORY L.Mid., L.Inf.? Rich crimson, maroon feather. This is the most consistently good rich-red we have ever grown and we have tried a lot of them.
L. 40c, M. 30c

STANLEY BURCH Med. E., L.Inf.? Vivid dark rose, upper petals lighter inside. Consistently good.
L. 15c, M. 12c, S. 8c

STANTON L.Mid., L.Inf. Medium to dark violet, purplish violet in throat. A good "Blue" without any red. Good culture will produce very fine, beautiful spikes of this variety.
L. 35c, M. 25c

S. W. VAN (Named for V. V.'s father.) L.Mid., L.Inf.? Beautiful scarlet with orange scarlet blotch. Another outstanding variety which can stand droughts as it produced wonderful spikes in the very dry season of 1944.
L. \$2.00, M. \$1.50.

TINY ROSE (44-N) Mid., Min.Inf. Medium rose, rose-red blotch, cream rib line. A nice miniature.
L. 15c, M. 12c, S. 8c

TWEEDLEDEE Mid., S.Inf. Odd shade of red with gold suffusion, edge and throat. Much admired. Many awards.
L. 10c, M. 8c, S. 6c

TWEEDLEDUM Mid., S.Inf. Upper petals dark rose-red back, medium rose-red front, lower petals yellow with rose edge, rosy maroon plume. Very many awards.

L. (sold out), M. 8c, S. 6c

VANBUFF Mid., L.Inf. Ruffled light buff, faint scarlet throat markings. V. of C., W. Va. Excellent commercial.

L. 20c, M. 15c

VANGOLD Med.E., L.Inf. Rich deep yellow. Acclaimed by many as "the best deep yellow". Though in hot, humid weather the petals may sometimes scald before fully opening, this variety is becoming more popular every year.

L. \$1 (Very few), M. 75c, S. 50c

VANLAVENDER Ear., L.Inf. Purplish lavender, white rib line and rosy-purple throat blotch. Darker than the usual lavenders, this variety is distinctive, and its earliness adds to its value as a fine commercial.

L. 25c, M. 20c, S. 15c

VANORA L.Mid., L.Inf. Medium orange, shading to gold in throat, smoky red splotches at edge of petals. This is a variety that seems to like dry weather for it was extra fine in 1944. Every Glad grower should have it as insurance against failure in a dry season.

L. 20c, M. 15c, S. 10c

VANPURPLE L.Mid., Med.Inf. Wine purple, gray speckling deep in throat. A nice dark variety.

L. 20c, M. 15c

VANSCARLET Mid., L.Inf.? Ruffled brilliant scarlet, cream rib line. A little erratic in performance, but good culture will produce wonderful results as attested by the A. of M. by W. Va.

L. \$1.00, M. 65c, S. 40c

VANWHITE L.Mid., L.For. Slightly ruffled, pure white (except that under unusual conditions it may develop a pale pink tinge). This is the finest pure white variety we have ever grown. Excellent 1944 in spite of drought. Demand growing.

L. 75c, M. 55c, S. 35c

VEECREAM L.Mid., L.Inf. Ruffled rich cream, with a scarlet blotch. "Most beautiful" and "most popular variety". A. of M., W. Va., Vote of Thanks N. E. G. S., and Grand Champion, Nebraska 1944. Amply repays good culture. Popular with local florists.

L. 15c, M. 10c, S. 2 for 15c. ½ pt. bulblets \$4.00 (net)

VEEPURPLE L., L.Inf. Wine-purple, darker throat. Nice to use with white or yellow.

L. 20c, M. 15c

VEEROSE L.Mid., Med.Inf. Bright rose, yellow rib streak. Very beautiful in both daylight and common artificial light.

L. 10c, M. 8c, S. 5c

VEEWINE L.Mid., Med.Inf. Excellent dark wine red.

L. 10c, M. 8c, S. 5c

WHITE TWEEDLE Early, S.Inf. Dainty white, violet rose blotch. Slightly ruffled and delightfully attractive because of the color combination.

L. 10c, M. 8c, S. 5c

YELLOW BIDDLE. Late, Med. (or S?) For. Rich yellow with only a very faint tinge of pink. Same good qualities as Jimmy Biddle but even more attractive in color.

L. 75c, M. 60c

YELLOW CRINKLES E.Mid., M. Inf. Deep yellow self-color with crinkled edges. Fine commercial.

L. 8c, M. 6c, S. 4c

Collections and other varieties follow order blank.

5 bulbs at 4 times and 25 bulbs at 17 times the single price.
No labeled single item less than 15c except in collections.

CULTURAL DIRECTIONS FOR AMARYLLIS SENT WITH EACH ORDER.

THRIPS CONTROL. Thrips, which cause the blooms to fail to open properly, are the chief cause of failure in the growing of fine Glads. These small insects often live over winter on the bulbs. They may travel a mile or more from infested gardens. To kill thrips in storage, use Napthalene Flakes at the rate of one tablespoon to 1 or 2 gallons of bulbs in moderately tight containers. Put on as soon in the fall as the bulbs are fairly dry and remove from the bulbs 6 or 8 weeks before planting. At planting time the bulbs may be soaked 8 to 12 hours in 1 teaspoon of Corrosive Sublimite to 2 gallons of water in non-metal containers, or in 2 tablespoons of Lysol to 3 gallons of water in any kind of containers. This kills all thrips and many kinds of disease spores. In summer to control thrips from other gardens, spray on a mist of 1 level teaspoon of Tartar Emetic and ½ cup Brown Sugar to 1 quart of water, after rain, or every 7 to 12 days, starting when the sprouts are a few inches high. Watch for silvery spots on the foliage. These usually are the first signs of the presence of the pests.

ADDITIONAL VAN GARDEN ORIGINATIONS ADMIRER BY MANY.

5 bulbs at 4 times and 25 bulbs at 17 times the single price.
